

TACTICAL SIDE POUCH INFLATABLE LIFE PRESERVER MD1250 & MD1250 SO

The low profile MD1250 provides flotation capability with minimum bulk or interference using separate, independently operated left and right side pouches. With the option to wear on a standard or padded LE belt or attach directly to Pouch Attachment Ladder System (PALS) webbing on Modular Lightweight Load-carrying Equipment (MOLLE) vests, the MD1250 is a versatile solution for users who require emergency flotation with minimal bulk or interference with gear.

Using Hydrostatic Inflator Technology, each pouch will automatically inflate when submerged in 4 or more inches of water but not inadvertently due to rain, spray or humidity. When fitted with the included manual conversion cap, the automatic hydrostatic function can be disabled only allowing manual activation by pulling the beaded handle.

The MD1250 is available in a black or coyote tan outershell with a yellow bladder and SOLAS-grade retro-reflective tape. The MD1250 SO is available in black and coyote tan outershell with an olive drab bladder and no retro-reflective tape.

QUICK INTEGRATION & EASY REPACKING

A unique dual strap system allows the MD1250 to be quickly attached to standard or padded Law Enforcement belts up to 3" wide or integrated with a MOLLE style vest, body armor and most other tactical vests. SecureZIP™ closure withstands rigorous activity and is easy to repack.

RELIABLE INFLATION

The Hydrostatic Inflation System will not inflate prematurely due to rain, humidity or wind-driven sea spray. The inflatable cell achieves full inflation within seconds of immersion, or with a simple pull of the beaded handle. An oral inflation tube provides backup inflation, if necessary and can also be used to reduce buoyancy if needed.

INCLUDED MANUAL CONVERSION CAP

The included manual conversion cap can be installed over the inflator's water inlet port to prevent automatic operation. This allows the wearer to select the inflation capability (manual or automatic) prior to the mission.

LOW MAINTENANCE

No inflator maintenance is required for five years, unless inflated.

MD1250

Shown with HIT™ Inflator and MA7219 (automatic to manual inflation conversion cap).

SIZING

Universal Adult Sizing (Right and Left Units required)

COLOR

MD1250 – Outer cover: Black or Coyote Tan
Bladder color: Yellow with SOLAS retro-reflective tape.

MD1250 S0 – Outer cover: Black or Coyote Tan
Bladder color: Olive Drab

FLOTATION

Each unit (left and right) provides 35 lb. buoyancy for 70 lb. total buoyancy. This high level of buoyancy helps offset the weight of equipment. A nylon webbing strap with Velcro attachments located on the front of the bladders is included to allow the wearer to connect the front lobes of the life preserver once inflated to better support the wearer in the water.

REPLACEMENT COMPONENTS

2x **MA7214-10** Re-Arm Kits required for MD1250.

All suits are tested to ensure the highest level of reliability and performance. Our commitment to quality has earned our Richmond facilities ISO9001 registration, the highest of all international standards. This is our guarantee you're receiving the ultimate in design and manufacturing.
